

## LADDERS & BED WEIGHT CAPACITY

MAXTRIX® Ladders are built to hold the weight of both kids and parents and feature safety grooves to help prevent slippage. Ladder sides and steps are nearly 4" deep x 1" thick. All ladders are tested and conform to current safety regulations. All MAXTRIX® beds are sold with wooden slats, and can withstand more than 800lbs of weight pressure, more than 2 x US Safety Regulations.

## ROCK LOCK SOLID

The Rock Lock Leg Bolt is a patented solid steel mechanism that enables the application of continuous pressure between the leg extensions and the basic bed legs. It is a Patented mechanism and uniquely developed to lock all MAXTRIX® beds into a Rock Solid state.

## EXTRA SOLID CASEGOOD CONSTRUCTION

MAXTRIX® Dressers feature solid hardwood frame construction. The drawers including drawer face and drawer box are made from solid wood. The drawer box itself features high quality English Dovetail construction. Our Drawers are reinforced with cross beams, helping them to withstand 100lbs in weight.

## OUR MATERIALS

Premium Hardwoods: MAPLE BIRCH ASPEN. MAXTRIX® products are mainly made from premium grade, sustainably harvested solid hardwoods like Maple, Birch and Aspen.

We use "Select grade" wood, which is a premier classification of beautifully clean and clear wood. We offset the high premium of this material by achieving an extremely low level of waste material in our factory.

We do not accept knots in the hardwoods we use in our bedframes or visible surfaces of our case goods (dressers, bookcases and desks). Maxtrix® is made to last!

## Guard Rails & Mattresses

Maxtrix is proud to feature one of the tallest guard rails in the industry!

Maxtrix® Safety Standards. Safety is our number 1 concern, so we beat US AND EU safety standards!

## WITHSTANDS 800 LBS WEIGHT

## MAXTRIX® IS FULLY COMPLIANT

MAXTRIX® FEATURES INDUSTRY-LEADING 11" SAFETY GUARD HEIGHT WITH A LOW PROFILE MATTRESS SUCH AS MAXMATTRESS

MAXTRIX® IS FULLY COMPLIANT. MAXTRIX® PROVIDES OPTIONAL WOODEN PLUGS TO COVER DRILL HOLES. SHOULD YOU CHOOSE TO USE THEM, ENSURE THEY ARE FIRMLY INSERTED AT ASSEMBLY TO AVOID CHOKING HAZARD.

MAXTRIX® USES ACRYLIC PAINT FOR THE WHITE FINISH, NC LACQUER (NITRO CELLULOSE) FOR NATURAL AND CHESTNUT FINISHES. BOTH GET TESTED TWICE - BY OUR SUPPLIERS AND AGAIN BY US - FOR CHEMICAL COMPLIANCE FOR US AND EU SAFETY STANDARDS.

MAXTRIX® SLIDES ARE DESIGNED EXTRA STURDY AND FEATURE A CURVED LANDING AREA, WITH 3" HIGH SIDES

OUR PATENTED ROCK LOCK™ SYSTEM CREATES A ROCK SOLID CONNECTION BETWEEN 2 BEDS.

ALL DRESSERS COME WITH AN ANTI-TIP KIT, DRAWERS HAVE PASSED COMMERCIAL GRADE TESTS (WITHSTANDING OPENING AND CLOSING 40 000 TIMES)

WITH EVERY ANGLE LADDER, MAXTRIX® PROVIDES AN EXTRA STURDY HANDRAIL TO SAFELY GET IN AND OUT OF BED. MAXTRIX® LADDER STEPS ARE GROOVED TO AVOID SLIPPAGE.
